

Tracking of Travellers

**Do you have employees travelling in
High Risk Areas?**

**Would you like to provide them with
additional safety?**

This is easily done by a tracking device.

**SOS International uses the VISMO
– Mobile Phone tracking application,
the Iridium SAT-tracking system G-SAT.**

TRACKER

EMPLOYEE TRACKING

Guardian or your company will get the current GPS location of every employee. View current or historic locations alongside with the battery life.

PANIC BUTTON

We will turn your smartphone into a GPS tracker with a covert panic button feature. Alerts sent in real time using SMS and email.

GEO-FENCING

Our Duty Officer can define high-risk areas and safe zones by drawing any shape onto a map and receive alerts as employees enter and leave geo-fences.

CRISIS MANAGEMENT

When global incidents occur, the Duty Officer will use Vismo to show the latest position of any employee in the vicinity and instantly send SMS to all.

GLOBAL TRACKING

Our tracking solutions work anywhere in the world on mobile phone or satellite networks providing worldwide coverage.

SMARTPHONE, TABLET & SAT-TRACKER

Tracking is available on iPhone, iPad, Android and BlackBerry, plus on Iridium satellite phones.

SYSTEM USE

SOS International provides 24/7 manned emergency centre capable of tracking your employees. Should you however prefer to use the system by yourself, this is possible and we will of course provide you with the best possible support and guidance.

HOW THE TRACKING WORKS

Cell tower ID from mobile network

GPS fixes location from satellites if available

Assisted GPS/Wi-Fi Access Points

Location Fixes sent over GPRS mobile network

VISMO-hosted Servers or Corporate install

VISMO website accessed anywhere

ALARM / PANIC OPERATION
